AI Configuration

Manage routing, parameters, and governance for institutional AI features.

AI Routing & LLM Preferences

ACTIVE MODEL PROVIDER

GPT-4o (OpenAI)

Default model for institutional tasks.

CREATIVITY PARAMETER (TEMPERATURE)

0.5

Precise (0.0) Creative (1.0)

Active Sub-Systems

Ticket Categorization

Auto-routes FM requests to correct departments.

☒

SLA Priority Classification

Determines urgency based on text sentiment.

☒

Monthly MIS Summary

Generates executive summaries from raw data.

☒

Marketplace Vendor Matching

Suggests contractors for complex work orders.

☐

AI Governance Rules

G-08 COMPLIANCE

Important: AI algorithms are restricted from auto-awarding contracts, auto-approving payouts, committing financial spend, or executing leases. Every AI recommendation goes to a 'Pending Human Approval' state.

👁️ AI Shadow Mode

Observation-only execution for algorithm calibration.
